

Quality Pheromones and Trapping Systems

Insects Limited, Inc. researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

All Moth Kit GW108-R

Product Description

Comes in quantities of 10. This kit includes Flat Traps™ and pheromone lures for Food Moths and Clothes Moths

Features and Benefits

All Moth Kits feature Insect Limited's signature pheromone lures that blend the powerful pheromones for Food Moths and Clothes Moths into a single, easy to use lure that will attract these moths over 40-60 days. The pheromones in this lure will attract Indian meal moth, Plodia interpunctella, Almond Moth, Cadra cautella, Mediterranean Flour Moth, Ephestia kuehniella, Webbing Clothes Moth, Tineola bisselliella, Casemaking Clothes Moth, Tinea pellionella, Brown-dotted Clothes Moth, Niditinea fuscella and other species of Food Moths and Clothes Moths. The lures are paired with the Flat Trap™ which is an excellent means of capturing these moths. These traps can easily be placed on floors, under furniture, on shelves in closets, or throughout spaces, or storage rooms. Moths that are attracted to the lure are readily stuck in the glue upon entering the trap.

How This Product Can Help You

This All Moth Kit pairs the science of insect biology to the technology of a trapping system to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers by:

1. Telling you if the moths are present
2. Indicating where they are coming from
3. Finally telling you whether the control measures (E.g. sanitation, infested product removal, freezing, etc.) that you have taken are working or not.

What to Expect

When you open this kit box, you will find the 10 stacked traps along with 10 individually packaged All Moth lures. The box will also include an Instruction Sheet of

- How to Assemble the traps
- Where to place the traps
- When to replace the traps.

Each pheromone lure is individually packaged to keep them fresh until you are ready to place them into a trap. When you are ready to use this product, the lure package should be torn open and the lures should be removed and placed into the center of the glue pads on each trap. Although the pheromone in the lures is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made. Pheromone lures are non-pesticidal and only act as an insect attractant. If the glue from the trap accidentally gets onto your hands, it is not toxic and can be easily washed off using soap and warm water. The traps are then ready to be placed out in areas where moths are being seen. These traps will begin your monitoring program for Food Moths and Clothes Moths that are attracted to the blend of pheromones in these lures. These traps will give you the information that you need to locate your moth issue.
