

# Quality Pheromones and Trapping Systems

Insects Limited, Inc. researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

## Hide Beetle Flat Trap Kit (IL-1000)

Comes in quantities of 10 or 100. Hide Beetle Flat Traps™ and pheromone lures for the Hide Beetle, *Dermestes maculatus*

### Features and Benefits

Hide Beetle kits feature Insect Limited's signature pheromone lures that use a blend of 8 different pheromones mixed into a food attractant, to draw-in Hide Beetles over a 3-month period. The lures are paired with the Flat Trap™ which is the recommended, field-tested and best trapping system for these beetles. These traps can easily be placed on floors, under furniture or on shelves in closets or throughout other living spaces or storage rooms. Beetles that are attracted to the lure are readily stuck in the glue upon entering the trap.

### How This Product Can Help You

This Hide Beetle Kit pairs the science of insect biology to the technology of a trapping system to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. When paired with a trapping system, the lures do this by:

1. Telling you if the beetles are present
2. Indicating where they are coming from
3. Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not

### What to Expect

When you open this kit box, you will find the traps unfolded, and stacked along with individually packaged Bullet Lures and an Instruction Sheet of

- How to place the lure into the trap
- Where to place the traps
- When to replace the traps

The traps will need to be folded into place by hand, according to the instructions on the back of the kit box. The glue pad on each trap is covered with release paper that should be removed after the traps have been folded into place.

Each pheromone lure is packaged in a resealable container to keep them fresh until you are ready to place them into a trap. When you are ready to use this product, the lures should be removed from their package and placed on their sides into the center of the glue pads on each trap.

The traps are then ready to be placed out in areas where beetles are being seen. These traps will begin your monitoring program for Hide Beetles that are attracted to the blend of pheromones and food attractants. These traps will give you the information that you need to reduce or remove your Hide Beetle issue.

Although the pheromone in the lures is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made. Pheromone lures are non-pesticidal and only act as an insect attractant. If the glue from the trap accidentally gets onto your hands, it is not toxic and can be easily washed off using soap and warm water.

### Shipping Information

Each Hide Beetle Kit box has dimensions of 10 inches X 9 inches X 1 inches and weighs 1 lb for shipping purposes. Online customers can choose their shipping options at checkout. Orders placed before 3pm EST typically get processed that day. If placed after 3pm EST, your order will be processed the next business day. Orders are shipped M-F.
