

Quality Pheromones and Trapping Systems

Insects Limited, Inc. researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

Moth Suppression Attractant Lure (IL-105)

Product Description

10 Moth Suppression™ Female Attractant Lures/Sex Pheromone Lures™ for Male and Female Moths of the species: Indian Meal Moth (*Plodia interpunctella*), Mediterranean Flour Moth (*Ephestia kuehniella*), Almond Moth (*Ephestia cautella*), Tobacco Moth (*Ephestia elutella*) and other food moths.

Features and Benefits

Insect Limited's proprietary Moth Suppression Lures™ attract both male and female moths of multiple species of food moth with a controlled release of both sex pheromone & egg-laying attractant over 2 months.

The Moth Suppression Lures are best paired with the scientifically designed Moth Suppression Trap™. Male and female moths are attracted to the lure and are readily stuck in the glue upon entering the trap. Traps are not included with this product.

How This Product Can Help You

Moth Suppression Lures assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. When paired with a trapping system, the lures do this by:

- 1.) Telling you if the moths are present
- 2.) Indicating where they are coming from and
- 3.) Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not

What to Expect

When you open this box, you will find the 10 Moth Suppression Lures (1 jar of 10 lures/jar) and an Instruction Sheet.

Each jar containing the lures is packaged to keep them fresh until you are ready to place them into a trap. When you are ready to use this product, the lures should be removed from the screw-lid jar using tweezers and placed on their sides into the center of the bottom portion of the glue in each Moth Suppression trap. Although the pheromone and egg-laying attractant in the lures is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made.

Shipping Information

Each Moth Suppression Lure box has dimensions of 7 X 7 X 5 in and weighs 1 lb for shipping purposes. Online customers can choose their shipping options at checkout. Orders placed before 3pm EST typically get processed that day. If placed after 3pm EST, your order will be processed the next business day. Orders are shipped M-F.
