

# Quality Pheromones and Trapping Systems

[Insects Limited, Inc.](#) researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

## Rice Weevil Bullet Lure (IL-703)

10 pheromone Bullet Lures™ for Rice Weevil (*Sitophilus oryzae*, *Sitophilus zeamais*)

### Features and Benefits

The set of Bullet Lures™ (IL-703) features the Insect Limited's signature pheromone Bullet Lures™ that attract Rice Weevils with a controlled release of pheromone over 3 months. Rice Weevils are attracted to the lure and are readily stuck in the glue when paired with a sticky trap trapping system.

### How This Product Can Help You

The Rice Weevil Bullet Lures pair the science of insect biology to a synthetically designed and laboratory-produced pheromone to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. When paired with a trapping system, the lures do this by:

- 1.) Telling you if the weevils are present
- 2.) Indicating where they are coming from and
- 3.) Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not

### How to Use This Product

When you open this box, you will find 10 pheromone Bullet Lures™. Each pheromone lure is individually packaged to keep them fresh until you are ready to place them into a trap.

When you are ready to use this product, the lures should be removed from their packaging by cutting or tearing the plastic package. The lures should then be placed on their sides into the center of the glue surface of sticky traps.

Although the pheromone in the Bullet Lures™ is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made. Pheromone Bullet Lures™ are non-pesticidal and only act as a moth attractant.

### Shipping Information

Each Rice Weevil Bullet Lure box has dimensions of 8 inches X 6 inches X 4 inches and weighs 1 lb for shipping purposes. Online customers can choose their shipping options at checkout. Orders placed before 3pm EST typically get processed that day. If placed after 3pm EST, your order will be processed the next business day. Orders are shipped Monday-Friday.
