

Quality Pheromones and Trapping Systems

Insects Limited, Inc. researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

Varied Carpet Beetle Kit IL-110

10 Flat Traps™ and 10 pheromone Bullet Lures™ for Varied Carpet Beetle (*Anthrenus verbasci*)

Features and Benefits

The Varied Carpet Beetle Kit features the Insect Limited's signature pheromone Bullet Lures™ that attract Varied Carpet Beetles with a controlled release of pheromone over 3 months. The Bullet Lures are paired with the Flat Trap™ which is a field-tested trapping system for carpet beetles.

These traps can easily be placed on floors, under furniture or on shelves in closets or throughout other living spaces or storage rooms. Beetles that are attracted to the lure are readily stuck in the glue upon entering the trap.

How This Product Can Help You

This Varied Carpet Beetle Kit pairs the science of insect biology to the technology of a trapping system to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. When paired with a trapping system, the lures do this by:

- Telling you if the beetles are present
- Indicating where they are coming from
- Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not

What to Expect

When you open this kit box, you will find the 10 traps unfolded, and stacked along with 10 individually packaged Bullet Lures and an Instruction Sheet of:

- How to place the lure into the trap
- Where to place the traps
- When to replace the traps

The traps will need to be folded into place by hand, according to the instructions on the back of the kit box. The glue pad on each trap is covered with an easily removed plastic cover that should be removed after the traps have been folded into place.

Each pheromone lure is individually packaged to keep them fresh until you are ready to place them into a trap. When you are ready to use this product, the lures should be removed from their packaging and placed on their sides into the center of the glue pads on each trap. Pheromone Bullet Lures are non-pesticidal and only act as an insect attractant. If the glue from the trap accidentally gets onto your hands, it is not toxic and can be easily washed off using soap and warm water.

Although the pheromone in the Bullet Lures™ is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made. Pheromone Bullet Lures™ are non-pesticidal and only act as a moth attractant.

Shipping Information

Each Varied Carpet Beetle Kit box has dimensions of 10 inches X 9 inches X 1 inches and weighs 1 lb for shipping purposes.
